

TASKFLOW

Admin Panel Documentation

The Admin Panel is the central command center of the TaskFlow platform. It provides complete organizational oversight and system-wide configuration capabilities.

Global Dashboard

- Real-time metrics on active employees and tasks.
- System-wide tracking of company assets (Vehicles, Patents, Websites).
- Organizational forecasting and health indicators.

User & Role Management

- Create and manage user accounts across all tiers.
- Dynamic Permission Matrix to control module access per role.
- Secure authentication and access auditing.

Human Resources

- Complete employee directory with history and sensitive data.
- Onboarding pipeline management for new hires.
- "Do Not Hire" registry for compliance and security.

Asset Management

- **Vehicles:** Fleet assignments, mileage, and inspections.
- **Appliances:** Equipment tracking and maintenance.
- **Digital Assets:** Patents and domain portfolios.

System Settings & Aesthetics

- **Theme Engine:** Visual customization of the entire platform.
- Configuring auto-logout, email preferences, and global company details.
