

TASKFLOW

Manager Panel Documentation

The Manager Panel is designed for operational leadership, focusing on team productivity, task execution, and resource coordination.

Operational Dashboard

- Monitor department-specific pending and overdue tasks.
- Track real-time employee clock-in status.
- Review recent system activity and event logs.

Task & Project Management

- Create, assign, and monitor team tasks with strict deadlines.
- Set priorities and provide detailed execution guidelines.
- Review End-of-Day (EOD) reports to track incremental progress.

Team Scheduling

- Manage and adjust shift schedules for team members.
- Monitor shift compliance and attendance.
- Process and review employee leave requests.

Resource Allocation

- View available company vehicles and appliances.
- Assign resources to specific employees or projects.
- Ensure efficient utilization of operational assets.
